INDUSTRIAL AND MISCELLANEOUS SECURITIES

In the rearrangement of our quotation lists we classify under the designation "Industrial and Miscellaneous Securities," all issues which *do not* appear under the previous two headings, namely "Railroads (Steam)" and "Public Utilities." In the case of stocks, however, we put "Textile Manufacturing," "Insurance," "Mining," "Real Estate and Land," "Title Guarantee and Safe Deposit Companies" under separate heads, then follow with the rest of the "Industrial and Miscellaneous."

Quotations marked "f" indicate that accrued interest is included in the price. Prices not marked are "and interest," that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

a Purchaser also pays accrued dividend. *b* New stock. *d* Price per share, not per cent. *i* Ex-100% stock div. *k* Last sale. *n* Nominal. *s* Sale price. *t* Ex-stock div. *u* Ex-cash and stock div. *x* Ex-dividend. *y* Ex-rights. † Without par value.

STATE AND MUNICIPAL BONDS

In State and municipal bonds the custom has always been to quote them, "and interest." That is the accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity will net to the purchaser at the present market price.

b Basis. *f* Flat price. *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

THE FINANCIAL REVIEW

This well-known year-book of Financial Facts and Information issued annually in March is a handsomely bound volume of 400 pages. It furnishes a complete record of financial and industrial events and markets for the preceding calendar year, with extensive statistics regarding crop, and other productions, foreign commerce, output of the precious metals, stock and bond prices, etc., for a term of years.

Price of the Review, bound in cloth.....$2.25

Parties desiring ten or more copies can have their names stamped on the covers, in gilt, at reduced prices.

REVIEW OF AUGUST.

There were two events of over shadowing importance during the month of August, the one relating to domestic affairs and the other to foreign affairs. In the first case of course we have reference to the crisis that grew out of the demands of the trainmen on all the railroads of the United States, namely locomotive engineers, firemen, conductors and other train hands for an eight-hour day and time and a half for overtime, and in the second case to the entry of Rumania into the European war on the side of the Entente Powers.

The controversy between the railroads and the various classes of train employees was an active factor throughout the month, and took on a steadily more menacing aspect as the month progressed, until toward the close the country seemed on the verge of the long-threatened strike, a strike order having actually been issued to the 640 local Chairmen of the different trainmen's organizations to become effective at 7 a. m. on Labor Day, Monday, Sept. 4. The counting of the ballots cast by the 400,000 trainmen on the question of a nation-wide strike to enforce the demand for an eight-hour day was begun in this city on Aug. 1 at the Broadway Central Hotel. While the result of the vote was not made known until the 8th inst., it was early announced that the result would be overwhelmingly in favor of giving the brotherhood leaders authority to declare a strike if the demands were not met. At the same time Samuel Gompers, President of the American Federation of Labor, took pains to pledge to the brotherhoods the support of the Federation in the event of a strike.

President Wilson actively interested himself in the controversy as the possibility of a strike began to loom larger. On August 3 the prospective strike was the subject of a conference between President Wilson and William L. Chambers, Commissioner of the Federal Board of Mediation and Conciliation. There was a vacancy on this board which the President filled on that day by designating W. W. Hanger, Assistant Commissioner of the Board of Mediation and Conciliation, as a member of the Board, the other two members being Judge Martin A. Knapp and William L. Chambers. It soon became apparent, however, that the Board of Mediation would be able to accomplish nothing, inasmuch as the trainmen's organizations insisted that the eight-hour day must be granted, while the railroad managers in their turn insisted that, as granting the demands of the trainmen (of which the eight-hour requirement was

the principal one) would involve an addition of $100,000,000 to the yearly expenses of the roads, the points at issue would have to be left to disinterested arbitration.

On Aug. 8 it was announced that the result of the referendum vote of the members of the different organizations was that 94% of the 400,000 men in the four brotherhoods had voted in favor of a strike in the event that their demands were not granted. With this announcement, A. B. Garretson, Chairman of the Union Conference Committee and President of the Order of Railway Conductors, blandly informed the railroad representatives that the next move was up to them. The railroads then, through Elisha Lee, Chairman of their committee, proposed that the trainmen join with the railroads in an application to the United States Board of Mediation and Conciliation and invoke its services for the purpose of effecting an amicable adjustment of the controversy. The heads of the trainmen's organizations declined to join in the request for mediation, pointing out, however, that the appeal for mediation did not need the concurrence of the men, since, under the law as it stands, either party can make the request therefor. When approached by the Board of Mediation and Conciliation itself, the answer of the employees' committee was that they would accept the mediators' proffer of their friendly offices, provided it was promptly exercised. This was on Aug. 9, and no time was lost in getting the mediation proceedings under way; for several hours the Federal mediators and the managers of the roads were closeted in secret session. The next day (Aug. 10) the Mediation Board conferred with the labor leaders. The latter again made it plain that they would insist on their original demands and would not consent to the arbitration of the questions in dispute. The railroads, too, showed that they were unyielding in their demand that there must be arbitration.

The members of the Mediation Board continued their conference with the railroad representatives up to Sunday, Aug. 13, when, with the final rejection by the labor leaders of the proposal to arbitrate the differences, President Wilson issued a call to the leaders of the opposing factions to confer with him personally before reaching a final decision.

Those to whom the above communication was addressed were: Elisha Lee, Chairman National Committee on Railways; A. B. Garretson, President Order Railway Conductors; W. S. Stone, Grand Chief Brotherhood Railroad Engineers; W. S. Carter, President Brotherhood Railroad Firemen; W. B. Lee, President Brotherhood Railroad Trainmen.

On Aug. 17 640 representatives of the railroad brotherhoods, who had also been called into the conferences with the President, received from him his proposals for effecting a settlement. One of these proposals was that both sides accept the eight-hour day on the basis of ten hours' pay. Failing to get the Railroad Managers' Committee to endorse this suggestion, he dispatched telegrams to the presidents of many leading railways to meet with him.

After his talk with the railroad presidents thus summoned, Mr. Wilson on Aug. 19 issued a statement saying that he had "recommended the concession of the eight-hour day—that is, the substitution of an eight-hour day for the present ten-hour day in all the existing practices and agreements. I made this recommendation because I believe the concession right. The eight-hour day now undoubtedly has the sanction of the judgment of society in its favor and should be adopted as a basis for wages, even where the actual work to be done cannot be completed within eight hours."

The President later summoned further railroad presidents to meet him, but he found them all convinced that they could not yield the main demand of the employees and grant ten-hour pay for eight hours' work (the demands of the men being really for an eight-hour basing day and not an eight-hour work day, since in the railroad service pay is dependent in most cases upon the length of a run and the run may take either less than or more than eight hours), nor yet yield the principle of arbitration.

On Aug. 21 President Wilson further pleaded with the railroad executives to agree to the acceptance of his plan in order to avert a strike, but his efforts were no more successful than previously. In his talk with the railroad men on that day President Wilson told them that the European war had taught this country that it could no longer remain isolated and provincial; that by reason of its position in the affairs of the world "we must be ready to play our role as one of the dominant influences in world affairs"; that the varied business and economic interests of the country, to meet the exigencies of the new world conditions, must be brought together into a harmonious whole. He likewise told them that the accommodation and adjustment of these interests were a necessary part of national defense—"for our great national resources could not be made available or mobilized in this emergency as a necessary part of national defense" unless the railroads are made serviceable instrumentalities for backing up any plan of national preparedness.

On Aug. 25 the Committee of Four, representing the brotherhood, notified President Wilson that they would not be able to hold the committee together later than Saturday night, Aug. 26. The President then sent for the Committee representing the roads and apprised them of the situation. The railroad men announced as a counter proposal that they would concede the eight-hour day, but that the question of pay for this eight-hour day must be left to arbitration. On Sunday night, Aug. 27, the 640 local chairmen of the unions in preparing to leave for home were given sealed strike orders subject to release. One of these sealed envelopes was in some way opened and then the union secret was betrayed. It appeared that Monday morning, Sept. 4, at 7:00 o'clock had been set for the inauguration of the strike and it also appeared that the strike order bore date Aug. 14. When this was brought to the attention of the President he sent for the heads of the four unions, and demanded that they rescind at once the strike order issued while Mr. Wilson, as the head of the nation, was still trying to effect a settlement, but to the President's surprise the labor leaders replied that the strike order had gone beyond recall and that it was not in their power to revoke it.

On Tuesday, Aug. 29, as a last resort, the President appeared before Congress in person and suggested legislation intended to avert the strike. The President pointed out that the railway managers based their decision to reject his counsel upon their conviction that they must, at any cost to themselves or to the country, stand firm for the principle of abritration which the men had rejected, and explained his attitude as follows: "I based my counsel upon the indisputable fact that there was no means of obtaining arbitration. The law supplied none; earnest efforts at mediation had failed to influence the men in the least. To stand firm for the principle of arbitration and yet not get arbitration, seemed to me futile, and something more than futile, because it involved incalculable distress to the country and consequences in some respects worse than those of war, and that in the midst of peace. * * * A situation had to be met, whose elements and fixed conditions were indisputable. The practical and patriotic course to pursue, as it seemed to me, was to secure immediate peace by conceding the one thing in the demands of the men which society itself and any arbitrators who represented public sentiment, were most likely to approve, and immediately lay the foundations for securing arbitration with regard to everything else involved. The event has confirmed that judgment." The President then made the following recommendations for dealing with the situation:

First, immediate provision for the enlargement and administrative reorganization of the Inter-State Commerce Commission along the lines embodied in the bill recently passed by the House of Representatives and now awaiting action by the Senate, in order that the Commission may be enabled to deal with the many great and various duties now devolving upon it with a promptness and thoroughness which are with its present constitution and means of action practically impossible.

Second, the establishment of an eight-hour day as the legal basis alike of work and of wages in the employment of all railway employees who are actually engaged in the work of operating trains in inter-State transportation.

Third, the authorization of the appointment by the President of a small body of men to observe the actual results in experience of the adoption of the eight-hour day in railway transportation, alike for the men and for the railroads, its effects in the matter of operating cost, in the application of the existing practices and agreements to the new conditions, and in all other practical aspects, with the provision that the investigators shall report their conclusions to the Congress at the earliest possible date, but without recommendation as to legislative action, in order that the public may learn from an unprejudiced source just what actual developments have ensued.

Fourth, explicit approval by the Congress of the consideration by the Inter-State Commerce Commission of an increase of freight rates to meet such additional expenditures by the railroads as may have been rendered necessary by the adoption of the eight-hour day, and which have not been offset by administrative readjustments and economies, should the facts disclosed justify the increase.

Fifth, an amendment of the existing Federal statute which provides for the mediation, conciliation and arbitration of such controversies as the present, by adding to it a provision that in case the methods of accommodation now provided for should fail, a full public investigation of the merits of every such dispute shall be instituted and completed before a strike or lockout may lawfully be attempted.

And sixth, the lodgment in the hands of the Executive of the Power, in case of military necessity, to take control of such portions and such rolling stock of the railways of the country as may be required for military use, and to operate them for military purposes, with authority to draft into the military service of the United States such train crews and administrative officials as the circumstances require for their safe and efficient use.

The power conferred in this matter should be carefully and explicitly limited to cases of military necessity, but in all such cases it should be clear and ample.

There is one other thing we should do if we are true champions of arbitration. We should make all arbitral awards judgments by record of a court of law in order that their interpretation and enforcement may lie, not with one of the parties to the arbitration, but with an impartial and authoritative tribunal.

The rest of the month the President exerted himself with Congressmen and Senators to secure support for this scheme of legislation, and he found them responsive to most of his suggestions. The trainmen, in the meantime, stood firm on their strike order.

Rumania's entrance into the war on the side of the Allies occurred on Sunday, August 27. The event had long been looked for, in view of the Russian successes against Austria, but it came rather unexpectedly nevertheless. Rumania's decision to enter the war was reached at a meeting of the Crown Council, held Sunday morning at the Controceni Palace, Bucharest. King Ferdinand presided and the session was prolonged over a period of several hours. The Council consisted of nineteen members, of which number it is believed four to six opposed intervention. The note declaring that Rumania from 9 o'clock Sunday evening considered herself in a state of war with Austria-Hungary was presented to the Austro-Hungarian Foreign Minister Monday night, August 28, by the Rumanian Minister at Vienna.

Germany responded by declaring war on Rumania and Turkey did the same. Immediately following Rumania's action the German Kaiser dismissed General Erich von Falkenhayn as Chief of the Imperial General Staff of the German Army and appointed Field Marshal von Hindenburg to the position. It was announced that General von Falkenhayn would be given employment in another capacity and the Kaiser conferred upon him the Cross and Star of a Commander of the Royal Order of the House of Hohenzollern with swords. Lieutenant General von Ludendorf, Von Hindenburg's Chief of Staff, was appointed First Quartermaster-General under him. Von Hinderburg's appointment was regarded as having political as well as military significance, inasmuch as he is a popular idol in Germany.

Rumania's entrance into the war made the fifteenth Power engaged in the conflict. Italy Aug. 27 also declared war on Germany, and announced through the Swiss Government that it considered itself at war with Germany from August 28, but this, of course, was purely a matter of form, as Italy had been actively at war with Austria, Germany's ally, for over a year. At the close of the month the indications were that Greece would also be forced to abandon her policy of neutrality and side with the Entente Powers, notwithstanding King Constantine's pro-German leanings, Queen Sophia of Greece, his wife, being the sister of the German Kaiser. Popular discontent in Greece was provoked by the fact that the Bulgarians, in meeting or anticipating an offensive of the Entente Powers from Saloniki, had taken possession of a number of Greek points in Greek Macedonia. Some of the Greek troops put up a stout defense, though ordered to withdraw by their Government, on an understanding with Germany and Bulgaria that all Greek territory would be restored at the end of the war.

A loan of $250,000,000 to the United Kingdom of Great Britain and Ireland, in the shape of 2-year 5% collateral gold notes, the direct obligations of the British Government, was one of the events of the month. The loan was brought out by J. P. Morgan & Co. at the head of a powerful syndicate of banks and bankers. The notes are secured by collateral aggregating in value over $300,000,000 and consisting of: (1) $100,000,000 of stocks, bonds or other securities of corporations organized in the United States; (2) $100,000,000 of bonds or other obligations of the Government of the Dominion of Canada and stocks, bonds or other securities of the Canadian Pacific Railway; and (3) $100,000,000 of bonds or other obligations of Argentina, Chile, Norway, Sweden, Denmark, Switzerland and Holland. The syndicate underwrote the bonds at 98 and offered them for public subscription at 99, yielding slightly over 5½%. Subscription books were opened on Aug. 23 and were to have been closed at 10 A. M., Aug. 28. As a matter of fact, practically all of the notes had been sold at the opening of business Aug. 25 and, accordingly, notices were sent to the members of the underwriting syndicate on that day that the books would be closed Aug. 26 (Saturday) at noon.

Official announcement was also made on Aug. 24 by Brown Bros. & Co. of the completion of negotiations for the extension of a second commercial credit to France. The new credit is for $25,000,000 and was arranged for by a group of New York banks and bankers with ten French banks under the auspices of the Bank of France to facilitate the export to France of an equivalent amount of American merchandise.

Crop developments during the month were not favorable and tremendous advances occurred in grain (more particularly wheat) and also in cotton. In the case of wheat, the rise was in addition to the sharp advance the previous month, and for the two months combined, the appreciation in values has been over 50 cents a bushel. Values had been steadily rising when the Government report was published after trading hours on Tuesday, Aug. 8, and caused a further advance the next day of roughly 8 cents a bushel. Prices thereafter eased off a little, but the upward movement was later resumed on a continued large export inquiry and the growing belief that the world's supplies would all be needed. The announcement of Rumania's entrance into the war was followed by a sharp break, on the theory that this action would hasten the ending of the war and might result in releasing at almost any time

the accumulated supplies of Russian wheat in the Black Sea. The apparent growing imminence of the trainmen's strike on the railroads of the United States caused a further break on the fear that with the railroads tied up export shipments would be checked and wheat accumulate in this country. From $1 23⅝ Aug. 1, the Dec. option for wheat at Chicago advanced to $1 55½ Aug. 22, and touched the same figure again Aug. 26. From this figure, however, there was a drop to $1 41⅛ Aug. 31, with the close on that day at $1 45¾. The December option for corn at Chicago moved up from 66¾c. Aug. 1 to 76¼c. Aug. 26 and closed Aug. 31 at 73⅜c. The December option for oats at Chicago was 42⅝c. Aug. 1 and 50⅝c. Aug. 26, with the close Aug. 31 47⅜c.

In cotton, the rise was equally sensational in extent. What with continued drought west of the Mississippi and the boll weevil and other drawbacks east of the Mississippi, accounts were far from encouraging. Moreover, the appearance on the last day of August of the Government crop report, making the condition of the crop on Aug. 25 only 61.2 of the normal, apparently the very lowest on record, as compared with 72.3 on July 25, indicated that rumors of damage to the growing plant rested on a substantial foundation. In middling upland spot cotton the advance during the month in this market was over 3c. a pound, the quotation Aug. 31 being 16.40c., against 13.20c. July 31. Printing cloths at Fall River were marked up from 4¼c. to 4⅜c. on Aug. 8, then to 4½c. Aug. 25, and again to 4⅝c. Aug. 29.

In the stock market there was a considerable revival of activity, with a sharp advance in prices, particularly in the case of the industrial properties, but with some sharp reactions the latter part of the month. The rise continued throughout the greater part of the month, notwithstanding the unyielding attitude of the opposing forces in the railroad labor controversy, the general public not taking seriously current talk of the probability of a strike. The latter part of the month, however, with the knowledge that a strike order had actually been issued, to go into effect Sept. 4, and with the railroads placing embargoes on freight shipments in contemplation of the event, a realization of the menace involved in such a step began to be felt, with the natural effect of the depressing prices. The news on Aug. 28 that Rumania had engaged in war against the Teutonic Powers also had unfavorable effect on prices, since this action was taken to mean that the war would be correspondingly shortened. The activity at rising prices during most of the month had as its main foundation the fact that instead of war orders having slackened, as expected, these war orders were actually being repeated, on a large scale, so that the facilities of the iron and steel markets were being taxed to the utmost in taking care of the same. The course of steel prices, which for several months had tended downward, was as a result again reversed. The demand for copper also again increased. Altogether, the result was that the so-called war stocks once more came into great prominence. The possibility that the railroads might, as the result of negotiations with President Wilson, get an advance in rates if they should be finally forced to pay higher compensation to the trainmen, was not without effect at times in stimulating speculation even in the railroad stocks. In the general upward movement United States Steel shares were a conspicuous feature and the common stock advanced close to par, touching 99⅜ Aug. 23. From this figure there was a reaction of a few points, in sympathy with the decline in the general list in the last few days of the month, but this decline itself was arrested on the last day (Aug. 31) and recovery established on the receipt of news from Washington indicating that prospects of averting the railroad strike had again brightened. From 86 Aug. 2 Steel common touched 99⅜ Aug. 23, as already indicated, and closed Aug. 31 at 97⅞, and this furnishes a fair idea of the range of prices during the month for most of the industrial shares.

There were no special features in the foreign exchange market as far as sterling bills are concerned. The placing of the new British loan for $250,000,000 served in holding sterling prices at the arbitrary figures maintained so long by the British Treasury. The consequence was that, as for so many months past, fluctuations in sterling bills were confined to a narrow range. In Continental exchange the feature was the further break in German reichsmarks, as a result of continued Russian successes and the entrance of Rumania into the war. Bankers' sight bills on Berlin Aug. 31 got down as low as 70¼c. Francs were also inclined towards weakness the latter part of the month, notwithstanding the negotiation of the new French credit here for $25,000,000.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city

AGGREGATE DEPOSITS OF THE SEPARATE TRUST COMPANIES.

BOROUGH OF MANHATTAN—	*Aug.* 22 1907.	*Dec.* 31 1907.	*Jan.* 1 1910.	*Jan.* 2 1911.	*Dec.* 21 1911.	*Dec.* 9 1913.	*Dec.* 24 1914	*Dec.* 31 1915	*June* 30 1916.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1916. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. The black-faced letters in the column headed "*Interest Period*" indicate in each case the month when the bonds mature.

In accordance with the rule adopted by the New York Stock Exchange in 1909, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

a On the basis of $5 to the £ sterling. *b* On the basis of four marks to one dollar. *c* 1st installment paid. *d* Full paid. *e* Second installment paid. *s* Option sales. *u* This was a sale made "Seller 4 free." *y* Bonds "when issued." *z* Flat price.

STOCKS—PRICES AND SALES FOR AUGUST AND THE YEAR TO DATE.

In accordance with a rule of the Stock Exchange effective Oct. 13 1915, all stocks are now quoted dollars per share.

Prices are on basis of 100-share lots. Exceptions of stocks which sell only in a small way are noted by the letter *a*. Option sales are disregarded.

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909-to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

PUBLIC UTILITIES

In the following rearrangement of our quotation lists we bring together under the general designation of "Public Utilities," all the different forms of such securities, thinking it easier for the reader to find any particular issue in a general list than when the securities are subdivided under separate heads and there is doubt as to what head to look under. In other words, under "Public Utilities," we include Street and Electric Railways, Gas, Electric, Power, Water and Telegraph and Telephone Companies.

In quoting Public Utility bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest (should any payment be announced) and no designating mark is employed.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

a Purchaser also pays accrued dividend. *d* Price per share not per cent. *e* New stock. *h* Ex-stock dividend. *k* Last sale. *n* Nominal. *s* Sale price. *u* Ex-warrants. *v* Old stock. *x* Ex-dividend. *y* Ex-rights.

INDUSTRIAL AND MISCELLANEOUS SECURITIES

In the rearrangement of our quotation lists we classify under the designation "Industrial and Miscellaneous Securities," all issues which *do not* appear under the previous two headings, namely "Railroads (Steam)" and "Public Utilities." In the case of stocks, however, we put "Textile Manufacturing," "Insurance," "Mining," "Real Estate and Land," "Title Guarantee and Safe Deposit Companies" under separate heads, then follow with the rest of the "Industrial and Miscellaneous."

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest," that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

a Purchaser also pays accrued dividend. *b* New stock. *d* Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *t* Ex-stock div. *u* Ex-cash and stock div. *x* Ex-dividend. *y* Ex-rights. † Without par value.

STATE AND MUNICIPAL BONDS

In State and municipal bonds the custom has always been to quote them, "and interest." That is the accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity will net to the purchaser at the present market price.

b Basis. / Flat price. n Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

REVIEW OF SEPTEMBER.

Great activity continued in all lines of trade during September, and on the Stock Exchange a spirit of unqualified buoyancy developed, with a tremendous rise in prices all around. The controlling considerations were the multiplying evidences that the war in Europe would be very much prolonged, and as a consequence the exceptional demands upon this country from the European belligerents for supplies of all kinds would remain unabated, and that, therefore, the trade reaction in this country which is expected to follow the conclusion of peace, would be correspondingly deferred.

The adjournment of Congress was also considered a propitious event, particularly after its abject surrender to the railway brotherhoods in passing a law which, if it is constitutional, will, after the coming 1st of January, give the railway train hands all over the United States ten hours pay for eight hours work. The brotherhood leaders promptly canceled the strike order, in fear of which Congress had acted, when it appeared that they would get the legislation sought. While relief was felt that a tie-up of the railway transportation system of the United States, with the industrial paralysis it was certain to have caused, had been averted, it was, nevertheless, considered that peace at such a price had been dearly purchased. The Republican Presidential candidate, Charles E. Hughes, at once took issue with President Wilson on this matter. He insisted that the demands of the railway brotherhoods should have been submitted to arbitration and he sharply challenged the President's action in surrendering the principle of arbitration. In view of Mr. Hughes's bold course in thus taking up the issue, the result of the Maine election, which had been looked forward to with no little interest, was regarded with much satisfaction, inasmuch as it seemed to foreshadow the defeat of President Wilson and his party at the coming Presidential election, and this, too, exerted a stimulus upon affairs. The vote showed a plurality of about 13,000 for the Republican gubernatorial candidate and indicated that the bulk of the Roosevelt Progressive vote was going to the Republicans rather than to the Wilson Democrats.

Another event of the month which exerted no little influence in stimulating and promoting the feeling of optimism, was the closing of an order for copper of unprecedented magnitude on behalf of the Entente countries. This occurred on Sept. 23,

when John D. Ryan, President of the Anaconda Copper Co., and Joseph Clendenin, Manager of Sales for the American Smelting & Refining Co., acting as the representatives of the leading copper producers of the United States, made a contract with Great Britain and her allies, through the agency of J. P. Morgan & Company, for 200,000 gross tons of copper, or 448,000,000 pounds, of electroyltic copper to be delivered over the first six months of 1917 at prices supposed to be between 26c. and 27c. per pound. The transaction signified that the Allied Governments had agreed to take about one-third of our total production for six months, also that monthly exports probably would establish new records. In the first six months of 1916 the exports totaled 147,943 tons, of which the Entente Powers took 136,635 tons, and in the same period of 1915 the exports totaled 136,527 tons, of which the Entente Powers took 123,373 tons.

Continued large importations of gold occurred and an incident of the month, indicating how completely Europe was dependent upon the United States for credit, as for everything else, was the announcement on Sept. 27 that a syndicate headed by Kuhn, Loeb & Co., had underwritten a loan of $50,000,000 to the City of Paris. The loan, the first of its kind ever made by Paris outside of France, took the form of five-year bonds bearing 6% interest. The funds provided by the bond issue will be used to increase hospital facilities, build orphan asylums, to ease the lot of widows of soldiers and to maintain the unemployed. A part of the money will also be devoted to the welfare of the thousands of refugees who have flocked to the city. None of the proceeds are to be used for war purposes, and the loan is intended to reimburse the city of Paris for very heavy expenditures made by it for the alleviation of suffering caused by the war, and to provide for additional similar expenditures and for other municipal purposes. The principal and interest of the bonds are payable at the option of the holder either in United States gold coin in New York or in francs in Paris, at the fixed rate of 5.50 per dollar, thus giving to the holder the prospect of a very substantial profit in exchange, inasmuch as the normal rate of exchange before the war was about 5.18 francs per dollar. The Government of the French Republic undertakes to furnish, if necessary, to the City of Paris, gold in the amount needed to permit the payment of the principal and interest of the loan in New York.

The bonds were offered to the public on October 2 by the Kuhn, Loeb & Co. syndicate at 98¾, netting the investor about 6.30%, and were reported all sold the following morning, though the subscription books were not to have been closed until 3 p. m. Oct. 4. It is stated that subscribers got only 30% of the amount applied for.

In the European war fields the developments were of great importance. The conflict in all the different arenas was waged with greater violence than at any time during the period of more than two years since the outbreak of the war. With the entrance the previous month of Rumania into the war, fighting was carried on at a greatly increased number of points, the additions to the area being mainly in the Balkan regions. More and more the Teutonic Powers found themselves hemmed in on every side and had to repel well co-ordinated attacks from every direction on the part of the Entente Powers. On what is known as the Western front, namely in France and Belgium, the successes of the month were almost entirely with the English and the French. Indeed, considering the nature of the struggle in this area, where the warfare consists of the most desperate trench fighting and where the advances are by yards, so strongly is the German invader entre ched on French soil, the successes of the English and the French were really of sensational proportions, furnishing strong warrant for the confidently expressed hope of English and French Government officials that the Central Powers would, in the end, though not until after much further stubborn and desperate fighting, be vanquished. In the Balkan country, however, the fortunes of war seemed to vary greatly, with Germany and her allies not altogether on the defensive, but prosecuting an aggressive campaign, attended with a considerable measure of success.

On the western front the struggle kept going only one way; the Germans were gradually forced out of their entrenched positions. So relentless and overpowering were the attacks of the French and the English that towards the end of the month really rapid progress was made in pushing the Germans back. The French and the English reconquered many villages from the German foe. On Sept. 26 there occurred the fall of Combles, the pivotal point in the German lines guarding the approach to Bapaume on the north and Peronne on the south of the Somme front. This was followed by the fall of the hardly less important centre of Thiepval, at the northwestern end of the British lines.

A statement given out from the Grand Headquarters of the French Army on Sept. 30 stated that in the first thirteen weeks of the Somme offensive (since July 1) the French and British had captured more ground than had been taken by the Germans in more than six months of battling at Verdun. It was pointed out that the French and the British had re conquered 285 square kilometers of French territory (about 102 square miles), exceeding by 15 square kilometers the territory gained by the Germans at Verdun. Forty-five villages, the statement went on to say, each one organized into a veritable fortress by the Teutons, had fallen before the battering of French and British artillery. In every instance the German position was so strong, it was added, that it had to be broken down by shell fire before infantry could storm it. It was also claimed that a total of 62,000 prisoners, 285 cannon, half of which were heavy artillery pieces, and more than 1,000 machine guns had been captured. In an order of the day sent by General Joffre to the armies of the north under date of Friday, Sept. 29, the claims were not quite so extreme, though it referred evidently only to the French operations. The General Commander-in-Chief expressed great satisfaction to the troops who had been fighting unceasingly on the River Somme for nearly three months. After speaking of the valor and perseverance of the armies, he exclaimed: "Verdun relieved, 25 villages reconquered, more than 35,000 prisoners and 150 cannot taken, successive enemy lines broken through for a depth of 10 kilometers—such are the results already obtained." The British account of the operations (given out Oct. 4) was to the same effect and serves to supplement the French report. It said (in part):

"At the end of September the situation may be summarized as follows: Since the opening of the battle on July 1 we have taken 26,735 prisoners, and engaged 38 German divisions, of which 29 (about 350,000 men) have been withdrawn exhausted or broken. We hold the half-moon upland south of the Ancre, occupy every height of importance, and so have direct observation round to the east and northeast. The enemy has fallen back upon a fourth line behind a low ridge, just west of the Bapaume-Transloy road. The importance of the three months' offensive is not to be judged by the distance advanced or the number of enemy trench lines taken. It must be looked for in the effect upon the enemy's strength in numbers, material, and morale. The

enemy has used up his reserves in repeated costly and unsuccessful counter-attacks without causing our allies or ourselves to relax our steady, methodical pressure."

These victories, however, for the British and the French were gained at a frightful loss of life. Statements from Berlin on Sept. 20 claimed that conservative estimates showed a loss of 350,000 men by the British up to Sept. 15, since the 1st of July, when the great Somme drive began, and said that with the French losses included, the total would be brought up to 500,000 men. Figures given out at London on Sept. 30 did not entirely confirm these extreme estimates, but showed, nevertheless, that the losses had been extremely heavy. For the month of September the British casualties on all fronts were reported at 114,110 men and 5,439 officers, making 119,549 together. This compared with 127,945 casualties in August and 59,675 for the month of July, giving for the three months a total of 307,169.

Great Britain indicated, however, that she was fully prepared to make these heavy sacrifices, since they are regarded as affording assurances of ultimate victory, to achieve which no price is considered too high to pay. In an interview with David Lloyd George, the British Secretary for War, the latter declared that Britain had only begun to fight, and he indicated marked displeasure with suggestions that neutral countries might contemplate the idea of intervening, with a view to forcing peace proposals, or offering mediation to the belligerents. The British Empire, said Lloyd George, had invested thousands of its best lives to purchase future immunity for civilization. This investment was too great to be thrown away.

The German Government on its part seemed no less determined to continue the struggle rather than accept an inconclusive or ignominious peace. The German Reichstag convened in formal session on Sept. 28 and the Imperial Chancellor, Dr. Von Bethmann-Hollweg, delivered an address in which he referred to Great Britain as Germany's "most egotistical, fiercest and most obstinate enemy," and said the German nation firmly believed in the assurance of victory and was ready for any sacrifice. He concluded with the declaration that "Germany will not be permitted to think of peace while her house is burning. She must first extinguish the fire." He furthermore asserted that the year's harvests in Germany had been much better than those of 1915 and made Germany's position correspondingly more secure. It deserves to be noted, too, that earlier in the month Lord Derby, the British Under-Secretary for War, after a visit to the officers at the Western front, made the statement that the war could not possibly end within six months. It was cumulative evidence of this kind that formed the basis for the belief so widely entertained, as mentioned above, and which influenced all current operations in the United States, that the war had a long time yet to run.

In Rumania the German and Bulgarian troops continued their advance in the Dobrudja sector and two Rumanian fortresses, Tutrakan and Silistra, fell to the invaders early in the month. Wireless dispatches from Berlin on Sept. 7 stated that the Germans and the Bulgars had taken the strongly fortified town of Tutrakan by storm and that the count of prisoners already exceeded 20,000, among whom were two generals and over 400 other officers. It was also stated that more than 100 cannons had been captured. Kaiser Wilhelm sent a telegram of congratulation to the King of Bulgaria "on this brilliant feat of arms of thy brave soldiers, from which our new enemy may realize that we not only know how to defend ourselves, but may strike him even in his own country. May God help further.' The invaders continued their advance and on Sept. 16 official dispatches from Berlin by way of London stated that Field Marshal von Mackensen had gained "a decisive victory" over the Rumanian and Russian troops in the Rumanian Province of Dobrudja and that German, Bulgarian and Turkish troops were pursuing them. Dispatches from Sofia, Bulgaria, added that the "enemy was completely destroyed." Sofia also reported that in the battles at the Tutrakan bridgehead, at Silistria, and at Dobric, 522 officers and 28,000 men had been captured, together with 132 guns and much war material. This was up to Sept. 12, it was stated.

Later, however, it appeared that the victory had not been altogether "decisive." The Rumanians were evidently strengthened by Russian reinforcements, and on Sept. 21 the Rumanian official statement, issued from Bucharest, stated that "the battle which began on the 15th, ended Wednesday (the 20th) with the defeat of the enemy composed of German, Bulgarian and Turkish troops, who retired southward, burning villages in their retreat." Still later, however (Sept. 22), the German army headquarters bulletin stated that by an encircling counter attack by German-Bulgarian-Turkish troops against the flank and rear of the Rumanians, the latter were being driven back and in disorder. At the beginning of October there came rumors which, however, proved unfounded, that Von Mackensen had ordered the evacuation of the fortresses of Tutrakan and Silistria in Dobrudja because the Rumanians had thrown a force across the Danube into Bulgaria and thus threatened to outflank him. It quickly appeared that this force had met with disaster. A Sofia dispatch Oct. 4 via London, Oct. 5, stated that from 12,000 to 16,000 Rumanian troops had crossed the Danube in the rear of the main battle line in Dobrudja, but had been scattered and virtually wiped out. Some accounts gave the number that crossed as high as 24,000. The Sofia statement said that 15 or 16 Rumanian battalions, without artillery, had crossed the Danube near Rahovo and occupied the villages of Siwopol Kajamhle, Boroissawo, Maolowranowo, Golemowrajowo and Breschlien. To repulse them the Bulgarians had sent two columns from Rustchuk and Turtukai, which on Oct. 3 attacked the Rumanians and forced them to seek refuge in the direction of their pontoon bridge which was destroyed by Austrian monitors. The Rumanians retreated eastward, it is stated, in disorder, thereupon meeting the Bulgarian troops advancing from Turtukai. The surrounded Rumanians then were scattered, it is claimed, in all directions.

In Transylvania the Rumanian forces also appear to have sustained an important defeat. Dispatches from Vienna and Berlin via London Oct. 1, stated that near Hermannstadt German and Austro-Hungarian forces under command of General von Falkenhayn, who had been removed as Chief of Staff of the German Army the previous month, had gained a complete victory. Four days before, by a wide encircling movement, a column of Bavarian troops had blocked the road through Rothenthurm Pass, in the enemy's rear. All the enemy's attempts to reopen the road were fruitless. Simultaneously Austro-Hungarian and German troops from the west, north and south had advanced against the Rumanian divisions operating south of Hermannstadt. The enemy fought desperately in the battle, which was of the most sanguinary character. Deprived of any practicable roads, the remnants of the Rumanian troops fled, it was stated, into the Fogaras Mountains. The number of prisoners it was stated was increasing hourly, while the amount of booty was enormous, as the enemy had to abandon a wagon park which he did not have time to destroy.

An offensive resumed on Sept. 28 by the Rumanians against the Transylvanian eastern front, it was declared, had not been able to alter the result of this battle, although north of Fogaras and near Szekely Udvarhely and Oderhellen advanced troops had to retire on the main forces. On the other

hand, the Germans in a counter-attack south of Hendorf were said to have captured eleven Rumanian officers, 591 men, and three machine guns.

In Macedonia, however, the troops of the Entente Powers were generally successful in their operations and succeeded in pushing the Bulgarians back. French troops captured the town of Florina, Greece, from the Bulgarians, who then retired in the direction of Monastir; and at many other points the Entente forces made it uncomfortable for the Bulgarians, even where they did not succed in driving them back. In Greece the situation became very much disturbed and the Ministry under Zaimas was forced to resign. A new Ministry was formed under Kalogeropoulos, but failed of recognition by the Entente Powers, because the latter viewed it with suspicion. By order of the Greek Government the Greeks, the early part of the month, surrendered to the Bulgarians the last of the forts defending the Greek seaport of Kavala on the Aegean Sea. The Fourth Greek Army Corps, which was in garrison, voluntarily surrendered when the forts were occupied. They were transported to Germany with their entire arms and equipment, but are to be treated as neutrals and enjoy the hospitality of Germany until Greece shall be free from Entente invasion. This caused great discontent on the part of the Greeks sympathizing with the Entente Powers and finally led to a revolutionary uprising, former Premier Venizelos going to join in the movement. Admiral Coundouriotis also joined in the movement. A proclamation was issued by these two, pointing out that civil war would ensue in the event that the Government failed to ally itself with the Entente Powers. The proclamation concluded with the statement that "It would be a happy event if at the eleventh hour the King should decide to take the lead of the national forces. In a contrary event it is our duty to do the needful to save the country from the threatening ruin. We are entering the struggle convinced that the nation, independently of the State, will accomplish the miracle and bring the country back to the status of eighteen months ago." At the close of the month it seemed likely that Greece might declare war on Bulgaria at any moment.

On the Stock Exchange the month will long remain memorable. Transactions were on a steadily rising scale and the feeling of optimism and buoyancey knew no bounds. Dealings aggregated in excess of 1,000,000 shares day after day, and finally, on one day, went above 2,000,000 shares. For the whole month the sales reached 29,992,582 shares, against 18,399,286 shares in September last year, which was also an active period, and the increase of over 11 million shares indicated by this comparison shows how much greater are the dimensions of the present upward movement than the similar movement of twelve months ago. The rise in prices has been commensurate with the magnitude of the dealings. At first the so-called war stocks were chiefly prominent in the speculation, then the copper stocks came to the front, and finally the railroad shares also developed considerable strength and moved upward along with the rest, though less rapidly and in more moderate degree. The first manifestation of reviving activity came on Tuesday, Sept. 5, the day after Labor Day, and following the passage by Congress of the Railway Eight-Hour Bill. A feature that day was a great rise in International Mercantile Marine shares on the announcement that such was the prosperity now enjoyed by this shipping combination that arrangements had been made for the early taking of the company out of the hands of the courts and the dissolution of the receivership. All the industrial stocks participated in the upward movement on that day. The railroad shares were laggards, but were finally carried along with the general current. Thereafter, new high records for the year by all classes of stocks were established day after day. On Sept. 6 Steel common touched 100 and that was considered remarkable at the time, but later in the month these same shares reached 120⅝. The activity and advance continued week after week. On Monday, Sept. 25, following the announcement the previous Saturday of the conclusion of the large copper contract, still further activity developed, the copper shares being, of course, unusually prominent, and Anaconda shares rose to 102, against 84 on Sept. 1; in the afternoon of that day, however, a sharp and general slump in prices unexpectedly occurred. This reaction continued through the next day, but the market soon regained its tone and resumed its upward tendency, with the close Sept. 30 strong, though in a number of cases at some reaction from the best figures of the month.

The foreign exchange market was absolutely devoid of feature as far as sterling exchange is concerned. Quotations remained under the complete control of the British Treasury and rates for the leading classes of bankers' bills were altogether unchanged day after day and week after week. In sixty day bills there was no change whatever from 4 71½, while the range for sight bills was compassed within 4 75 11-16@4 75¾, and that for cable transfers within 4 76 7-16@4 76½. In rates on the Continental centres the feature was further great weakness in reichsmarks, sight bills on Berlin Sept. 5 getting down to 68⅞, but here there was marked recovery, the price Sept. 30 being 70⅝. French exchange showed an improving tendency, as was natural, in view of the arrangement of new credits here and the placing in New York of the $50,000,000 loan to the city of Paris.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city

AGGREGATE DEPOSITS OF THE SEPARATE TRUST COMPANIES.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1916. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. The black-faced letters in the column headed "*Interest Period*" indicate in each case the month when the bonds mature.

In accordance with the rule adopted by the New York Stock Exchange in 1909, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

STOCKS—PRICES AND SALES FOR SEPTEMBER AND THE YEAR TO DATE.

In accordance with a rule of the Stock Exchange effective Oct. 13 1915, all stocks are now quoted dollars per share.

Prices are on basis of 100-share lots. Exceptions of stocks which sell only in a small way are noted by the letter *a*. Option sales are disregarded.

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

PUBLIC UTILITIES

In the following rearrangement of our quotation lists we bring together under the general designation of "Public Utilities," all the different forms of such securities, thinking it easier for the reader to find any particular issue in a general list than when the securities are subdivided under separate heads and there is doubt as to what head to look under. In other words, under "Public Utilities," we include Street and Electric Railways, Gas, Electric, Power, Water and Telegraph and Telephone Companies.

In quoting Public Utility bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest (should any payment be announced) and no designating mark is employed.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

INDUSTRIAL AND MISCELLANEOUS SECURITIES

In the rearrangement of our quotation lists we classify under the designation "Industrial and Miscellaneous Securities," all issues which *do not* appear under the previous two headings, namely "Railroads (Steam)" and "Public Utilities." In the case of stocks, however, we put "Textile Manufacturing," "Insurance," "Mining," "Real Estate and Land," "Title Guarantee and Safe Deposit Companies" under separate heads, then follow with the rest of the "Industrial and Miscellaneous."

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest," that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

STATE AND MUNICIPAL BONDS

In State and municipal bonds the custom has always been to quote them, "and interest." That is the accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity will net to the purchaser at the present market price.

b Basis. *f* Flat price. *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

THE FINANCIAL REVIEW

This well-known year-book of Financial Facts and Information issued annually in **March** is a handsomely bound volume of 400 pages. It furnishes a complete record of financial and industrial events and markets for the preceding calendar year, with extensive statistics regarding crop, and other productions, foreign commerce, output of the precious metals, stock and bond prices, etc., for a term of years.

Price of the Review, bound in cloth.....$2.25

Parties desiring ten or more copies can have their names stamped on the covers, in gilt, at reduced prices.

REVIEW OF OCTOBER.

As in other months, there were many important developments during October, both at home and abroad, some of quite a disturbing character. Those relating to the war—and all the events of consequence had their origin in that momentous conflict—were kaleidoscopic in character. A rather sensational occurrence, early in the month, was the information vouchsafed by a trust company president that Germany had definitely concluded to indicate its willingness to conclude peace, an announcement which was given a dramatic turn within forty-eight hours by the appearance of a German submarine on our very coast and its prompt entry on the work of destroying merchant ships. By the end of the month these episodes had been forgotten and attention was turned to a feature which has been assuming growing dimensions of late, to wit, the noteworthy rise in commodity prices, especially in articles many of which form the first requisites of existence—grain, cotton, coal, &c.

The statement regarding Germany's determination to seek peace emanated from Mr. Charles H. Sabin, President of the Guaranty Trust Co. of this city. Mr. Sabin, on Friday, Oct. 6th, imparted to a number of newspaper men the news that he had information from reliable sources that Germany had decided to ask President Wilson to use his good offices in the endeavor to arrange peace. James W. Gerard, United States Ambassador to Germany, was then on his way home from Berlin for a short vacation, and it was assumed by the newspaper men (but not so stated by Mr. Sabin) that Mr. Gerard must be the bearer of a message to President Wilson asking the latter to mediate in a movement to bring about peace. At first Mr. Sabin would not permit his name to be used in connection with the statement, but the next day, Saturday, when he saw what a profound impression the report had caused—the stock market having suffered a severe reaction Friday afternoon, followed on Saturday by a sharp break, in the belief that the cessation of the war meant the end of the large purchases for account of the belligerents of Europe in the execution of which the industrial companies and the country at large were making such huge profits—Mr. Sabin assumed responsibility for the statement and reiterated that he had what he considered reliable information on the subject. Prompt denial came from Washington, accompanied by the statement that as far as the United States Government knew, no basis whatever existed for the reports that peace negotiations were

contemplated or that the aid of this country was being sought or was desired to that end. Ambassador Gerard, with his arrival the following Tuesday from Copenhagen on board the steamship Frederick VIII, also denied that his return to this country had any connection with any peace plans or that he was to be the medium for carrying them out.

More effective than denials was the occular demonstration which presently came that Germany was still actively engaged in waging war and had no intention of letting up in her attacks. On the same day (Saturday, Oct. 7) when peace talk was so rife, the German submarine U-53, equipped as a regular war vessel, arrived unexpectedly at Newport, Rhode Island, at 2:00 p.m. The submersible did not tarry long, but departed three hours after her arrival, the commanding officer, Lieutenant Hans Rose, having meanwhile paid his respects to the ranking U. S. Naval Officer at Newport, Rear-Admiral Austin M. Knight, and having handed a letter addressed to the German Ambassador, Count von Bernstorff, to the representative of one of the press associations to be dropped in the mail for delivery to the Count. Besides the commander, the vessel carried four officers and 33 men. Commander Rose explained that the submarine had put in at Newport merely to deliver official mail for the Ambassador. The U-53 flew the German Naval ensign and carried mounted guns on her deck and was in every way equipped as a belligerent submarine in contradistinction to the merchant submarine, the Deutschland, which had been here a short time before and returned to this country on a second trip on Oct. 31. The Deutschland is a merchant ship pure and simple. The U-53 had left Wilhelmshaven 17 days before she appeared at Newport.

It quickly transpired that the U-53 was not bent on any holiday task. Sunday afternoon and evening came the news that she had engaged in attacking a number of merchant ships. Five vessels altogether were sunk in this raid.

The news regarding these submarine attacks on our own coasts and the daring way in which they were carried out naturally created a profound impression. It also occasioned uneasiness out of a fear that the German plans might contemplate a resumption of submarine warfare that would involve conflict with the rules and principles insisted upon by the United States Government. It was evident that there might have been a serious loss of life except for the presence of U. S. torpedo boat destroyers in the vicinity of the raid. On Tuesday, October 10th, it was indicated by Administration officials that the facts which had been collected up to that time through Governmental agencies disclosed no grounds for drastic action by the United States, because of the attacks themselves—no evidence having been found that international law had been violated by the German submarine or submarines. On Wednesday, as a result of the conferences between President Wilson and Secretary Lansing, it was stated authoritatively that no evidence of the breaking of German promises to the United States had been discovered in connection with the submarine raid, but that the American Government would continue its investigations and watch closely any repetition of the attacks.

No further raids, however, were attempted and public apprehension thereafter quickly died down. The U-53, after her attacks off Nantucket, seems to have departed for Germany again. At all events, at the end of the month an official statement was given out at Berlin saying she had returned safely to a German port. In the meantime, Germany was continuing her submarine warfare in English waters, though apparently not in a way requiring interference by our Government. But on Oct. 30 cable dispatches from London reported that the British steamships Marina and Rowanmore had been torpedoed and sunk by German submarines off the Irish coast. There seem to have been 50 Americans in the Marina's crew, of whom some half dozen lost their lives. On the Rowanmore there were seven Americans (five being Philippinos), all of whom were saved. The serious feature of the sinking of the Marina was that reports agreed in saying that she had been attacked without warning and without giving those on board a chance to escape. No great apprehension, however, with regard to the outcome was entertained in this country; and aside from creating a temporary flurry on the Stock Exchange on October 30, the event was without special influence here.

With reference to the advance in commodity values, the most sensational rise occurred in the case of wheat, though, for extent of advance, corn did not lag far behind. Wheat reached higher figures than any attained under normal conditions since the Civil War. In this market No. 1 spring wheat sold above $2 a bushel. At Chicago the December option sold up from $1 54¼ Oct. 2 to $1 92⅜ Oct. 30, with the close Oct. 31 $1 89. The May option at Chicago advanced from $1 54 Oct. 2 to $1 88½ Oct. 30, with the close Oct. 31 $1 86. At the time of the Joseph Leiter corner in 1898, wheat in Chicago touched $1 85 a bushel and the Hutchinson corner of 1888 carried the price to $2 a bushel. The reason for the great advance was the large foreign demand and this year's shortened production in the United States, and also in Canada, and the reduced total of the world's crop of wheat. The crop of the United States, interpreted according to the official report of the U. S. Department of Agriculture for Oct. 1, works out only about 607,000,000 bushels, as against the previous season's unprecedented yield of 1,011,505,000 bushels. Normal home requirements are estimated at about 625,000,000 bushels, showing that left over supplies out of the previous year's crop will have to be appreciably encroached upon even to meet domestic wants. The carry-over from last season is estimated at no more than 160,000,000 bushels, of which a portion is reported unmerchantable. At the same time the Canadian crop for the present season is put at only 159,123,000 bushels, against 376,303,600 bushels last season. One event of the month was the announcement by cable from Broomhall at Liverpool on Oct. 20 that all present existing contracts in Manitoba wheat had been taken over by the British Government. London cables also stated that the British Government now prohibited its subjects from buying wheat futures in Chicago, though they were permitted to buy corn and oats. The advance was almost continuous throughout the month, except that a sharp break occurred on Oct. 9, in sympathy with lower prices of stocks and cotton, on news of the German submarine raid off Nantucket Island. Other grain prices also advanced, the December option for corn rising from 73c. on Oct. 2 to 91½c. Oct. 25, with the close Oct. 31 87¼c. The May option for corn at Chicago Oct. 25 got up to 92¾c., with the close Oct. 31 at 89c. The December option for oats moved up from 47¼c. Oct. 16 to 56⅛c. Oct. 25, with the close Oct. 31 54⅝c. The May option for oats at Chicago rose to 59¾c. Oct. 25, with the close Oct. 31 58c.

In cotton, also, there was a further sharp rise, this being likewise based on this year's shortened production, coming coincidently, with an active demand, both on home and foreign account. The Agricultural Bureau made the report of condition Sept. 25 only 56.3, the lowest on record. From 16c. Sept. 30 middling upland cotton in this market reached 19.30c. Oct. 24, and the fluctuations subsequent to that date left the quotation Oct. 31 at 19.15c. Print cloths at Fall River were marked up from 5 to 5⅛c. on Oct. 5, to 5¼c. on Oct. 6, to 5½c. on Oct. 14 and to 5¾c. Oct. 19.

With reference to advances elsewhere, iron and steel prices, already at phenomenal figures, mounted

still higher, and the latter part of the month even the pig iron market, which had for many months been lagging, cut loose, and, according to the "Iron Age" of this city, showed likeness to the war market for steel. Our contemporary stated that the advances were unprecedented in being due, not to a clamorous demand for iron for quick shipment, as in all previous excited markets, but to a simultaneous effort of buyers to cover far forward requirements—in many cases through the second half of 1917. The prosperity of the steel industry was indicated by the statement of the U. S. Steel Corporation, issued Oct. 31, showing net earnings for the September quarter of $85,817,067, against $81,126,048 in the June quarter, and $38,710,644 in the September quarter of last year.

Very high prices for coal were also recorded. In the Pittsburgh district sales of run-of-mine coal were reported at the close of the month at $5 a ton and furnace coke was quoted at above $7 50 a ton, a figure which is said to have no precedent. Labor is scarce and miners are more inclined to take holidays than to work, and the shortage of supply comes at a time of maximum consumptive demand. In the retail price for anthracite, especially in this city, very exceptional and extraordinary figures were recorded. Stove coal sold up to $13 a ton, as against the official price for September of $7 25. Here the explanation seems to be found mainly in the circumstance that householders suddenly got panic-stricken and, expecting a scarcity later in the season, began buying all of a sudden, in anticipation, and gave orders in consequence greatly in excess of their immediate needs.

Some large foreign loans were placed here during the month. A syndicate headed by Kuhn, Loeb & Co. underwrote a loan of $50,000,000 to the City of Paris. The loan is the first of its kind ever made by Paris and took the form of 5-year bonds bearing 6% interest. They were offered to the public on Oct. 2 by the syndicate at 98¾, netting the investor about 6.30%, and were about three times subscribed the following morning. The subscription books were then closed, although they were to have remained open until 3 p. m. Oct. 4; the bankers had reserved the right to close the same any time without notice. It is said that the subscribers got only 30% of the amount of bonds they had asked for. This loan is to reimburse the city of Paris for very heavy expenditures made by it for the alleviation of suffering caused by the war and to provide for additional similar expenditures and for other municipal purposes. The funds are to be used solely to increase hospital facilities, build orphan asylums, to ease the lot of widows of soldiers and to maintain the unemployed. A part of the money will also be devoted to the welfare of the thousands of refugees who have flocked to the city. None of the proceeds of the loan is to be used for war purposes. The principal and interest of the bonds are payable at the option of the holder either in United States gold coin in New York or in francs in Paris, at the fixed rate of 5.50 per dollar, thus giving to the holder the prospect for a very substantial profit in exchange, inasmuch as the normal rate of exchange before the war was about 5.18 francs per dollar.

The Government of the French Republic undertakes to furnish, if necessary, to the City of Paris gold in the amount needed to permit the payment of the principal and interest of the loan in New York.

A new loan for the British Government was brought out by J. P. Morgan & Co., as managers of the underwriting syndicate. The loan consisted of $300,000,000 of United Kingdom of Great Britain and Ireland 5½% secured gold notes, $150,000,000 being 3-year notes, due Nov. 1 1919, and $150,000,000 5-year notes, due Nov. 1 1921. They are the direct obligations of the British Government, with principal and interest payable in United States gold coin, at the office of J. P. Morgan & Co., or, at the option of the holder, in London, in sterling at the fixed rate of $4 86½ to the pound. Principal and interest payable without deduction for any British taxes, present or future. They are redeemable at the option of the Government, in whole or in part, on thirty days' notice, as follows :

	3-Year Notes.	5-Year Notes.
From Nov. 1 1916 to Oct. 31 1917, incl..	103 and int.	105 and int.
" " 1 1917 " 31 1918 "	102 and int.	104 and int.
" " 1 1918 " 31 1919 "	101 and int.	103 and int.
" " 1 1919 " 31 1920 "		102 and int.
" " 1 1920 " 31 1921 "		101 and int.

The notes are to be secured by pledge with Guaranty Trust Co. of New York, under a pledge agreement executed by the Government, of securities approved by J. P. Morgan & Co., of an aggregate value of not less than $360,000,000, calculated on the basis of then prevailing market prices, sterling securities being valued in dollars at the prevailing rate of exchange, viz.:

Group I. Stocks, bonds or other securities of American corporations (including the Canadian Pacific Railway Co.) and bonds or other obligations (either as maker or guarantor) of the Government of the Dominion of Canada, the Colony of Newfoundland, or Provinces of the Dominion of Canada, or Canadian municipalities: Aggregate value not less than $180,000,000
(Of the foregoing there will be somewhat over $100,000,000 in aggregate value of securities of corporations of the United States and of the Canadian Pacific Ry. Co.)

Group II. Bonds or other obligations (either as maker or guarantor) of any or all of the several following Governments, to wit: Commonwealth of Australia, Union of South Africa, New Zealand, Argentina, Chile, Cuba, Japan, Egypt, and India, or approximately $25,000,000 value in bonds or other obligations of dividend-paying British railway companies: Aggregate value not less than $180,000,000

Total $360,000,000

The notes were offered for subscription beginning Oct. 31, at 99¼ and interest for the 3-year notes, yielding over 5.75%; and at 98½ and interest for the 5-year notes, yielding about 5.85%.

The reasons which prompted the offering of the new loan at this time were set forth in a statement issued by J. P. Morgan & Co.:

A new British Government loan offering had not been in contemplation at the present time, but the prevailing ease of money and the difficulty which the banks are having in profitably employing their funds have led us to indicate to the British Government that the present is a favorable time for it to establish additional credits in America, even though such credits may not be immediately required. Accordingly, the British Treasury has to-day accepted the views of the American bankers and has authorized them to proceed.

The British Treasury has of late renewed its shipments of gold to this country upon a large scale. This continued influx of the metal has caused some concern in the banking community, and it is believed that the issuance of the proposed loan will tend to cause at least a temporary cessation in gold imports.

In the stock market the speculation for higher prices received a sharp check the early part of the month, but this, as it happened, proved only temporary, and with the removal of the causes responsible for it, the upward movement was resumed with great confidence, the result being that the larger part of the early declines was recovered and, in a few cases, more than recovered. Speculation was proceeding at a furious pace when, on Friday, Oct. 6th, the announcement came from a leading trust company president, as noted above, that he had information that Germany had determined to father peace proposals and would seek the good offices of the President of the United States in the endeavor to carry them through. As the definite conclusion of peace would mean the end of the extraordinary war profits which the industrial companies are enjoying, the effect of the announcement was to bring about a sharp downward reaction in prices on the day mentioned. On Saturday, Oct. 7, with the wider circulation of the statement referred to, the decline proceeded still further. By the time the market opened the following Monday morning the German submarine, the U-53, had made its raid upon merchant ships off Nantucket Island and accounts of the raid filled the columns of all the morning papers. This injected an entirely new feature into the situation. Instead of peace, there were now fears that complications between the United States and Germany would ensue as a consequence of the activities of the German submarine. Speculators accordingly became panic stricken and threw their holdings over regardless of price. The result was one of the most noteworthy collapses in prices ever recorded on the Stock Exchange. As instances of extreme declines, Baldwin Locomotive shares, which had sold at 93⅝ Oct. 3, and had closed at 89 on Saturday, Oct. 7, opened Monday morning, Oct. 9, at 80, and dropped further to 79½; while Republic Iron & Steel, which had sold at 82⅛ Oct. 3,

and closed Oct. 7 at 78⅛, opened Oct. 9 at 70 and dropped still further to 60. Steel common which had sold at 118⅞ Oct. 2, and closed at 116⅛ Oct. 7, opened at a range running all the way from 109 to 112 and later touched 108. By the end of the day a sharp recovery from the extreme low figures had been established; and the upward reaction made further progress the next few days, with the disappearance of the likelihood of trouble with Germany. Soon fears on that score vanished altogether, and with this, there came a complete revival of speculative confidence under which the market took a new impetus forward and upward. Railroad shares again assumed greater prominence, but the biggest advances in prices, as heretofore, were made in the industrial shares. We have compiled the following table, which is self-explanatory, to indicate the extent of the decline which occurred on Oct. 9, in the more active railroad and industrial shares, and also the recovery which ensued later in the month, as indicated by the closing prices Oct. 31:

	Previous High in October.	*Closing Sat., Oct. 7.*	*Opening Monday, Oct. 9.*	*Lowest Mon., Oct. 9.*	*Closing Mon., Oct. 9.*	*Closing Fri., Oct. 31.*

In the money market pronounced ease still continued the dominant feature, and little attention was given to the variations up and down in the money holdings and surplus reserves of the Clearing House banks.

Our foreign exchange market was but a repetition of that of the months immediately preceding, at least as far as the quotations for sterling bills were concerned. Rates apparently continued completely under the domination of the British Treasury, and fluctuations were limited to the minutest fraction, where there were any at all. The negotiation of the new $300,000,000 British Government loan, as also the $50,000,000 city of Paris loan, aided the British Government in its control of exchange rates. Gold importations were renewed on a large scale, the influx in the last week alone (the week ending Oct. 28) reaching no less than $40,000,000.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city

AGGREGATE DEPOSITS OF THE SEPARATE TRUST COMPANIES.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1916. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. The black-faced letters in the column headed "*Interest Period*" indicate in each case the month when the bonds mature.

In accordance with the rule adopted by the New York Stock Exchange in 1909, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks*

a On the basis of $5 to the £ sterling. *b* On the basis of four marks to one dollar. *c* 1st installment paid. *d* Full paid. *e* Second installment paid. *s* Option sales. *u* This was a sale made "Seller 4 free." *y* Bonds "when issued." *z* Flat price.

STOCKS—PRICES AND SALES FOR OCTOBER AND THE YEAR TO DATE.

In accordance with a rule of the Stock Exchange effective Oct. 13 1915, all stocks are now quoted dollars per share.

Prices are on basis of 100-share lots. Exceptions of stocks which sell only in a small way are noted by the letter *a*. Option sales are disregarded.

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest orms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

PUBLIC UTILITIES

In the following rearrangement of our quotation lists we bring together under the general designation of "Public Utilities," all the different forms of such securities, thinking it easier for the reader to find any particular issue in a general list than when the securities are subdivided under separate heads and there is doubt as to what head to look under. In other words, under "Public Utilities," we include Street and Electric Railways, Gas, Electric, Power, Water and Telegraph and Telephone Companies.

In quoting Public Utility bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest (should any payment be announced) and no designating mark is employed.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.

INDUSTRIAL AND MISCELLANEOUS SECURITIES

In the rearrangement of our quotation lists we classify under the designation "Industrial and Miscellaneous Securities," all issues which *do not* appear under the previous two headings, namely "Railroads (Steam)" and "Public Utilities." In the case of stocks, however, we put "Textile Manufacturing," "Insurance," "Mining," "Real Estate and Land," "Title Guarantee and Safe Deposit Companies" under separate heads, then follow with the rest of the "Industrial and Miscellaneous."

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest," that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are "and interest" except where marked "f" and income and defaulted bonds.
